

Citizen Science Lab on air Pollution – report and impressions

On 22-16 January 2018 the workshop Citizen Science Lab: Air Pollution took place at the Lorentz Center in Leiden as the first in a series of citizen science workshops. The workshop was very successful and yielded many new ideas and collaborations.

We like to share with you a brief report on the Lorentz Center website
<http://www.lorentzcenter.nl/lc/web/2018/929/report.pdf>

Also, you can get an impression of the workshop in a short YouTube video by Hester Volten
